CSE: INTL OTCQB: CRBTF FRA: 98AA

Forward-Looking Information

Certain statements contained in this Investor Presentation constitute forward-looking information or forward-looking statements (collectively, “forward-looking statements”) within the meaning of applicable Canadian and United States securities laws. Forward-looking statements include statements concerning the Company’s current expectations, estimates, projections, assumptions and beliefs. All statements other than statements of historical facts contained in this Investor Presentation are forward looking statements. These statements involve known and unknown risks, uncertainties and other important factors that may cause the Company’s actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. We have based the forward-looking statements largely on our current expectations, estimates, assumptions and projections about future events and financial trends that we believe, as of the date of such statements, may affect our business, financial condition and results of operations. Such expectations, estimates, assumptions, and projections, many of which are beyond our control, include, but are not limited to: projections of future financial and operational performance; statements with respect to future events or future performance; anticipated operating costs and revenue; estimates of capital expenditures; and future demand for and prices of digital currencies. Forward-looking information is necessarily based on estimates and assumptions that are inherently subject to known and unknown risks, uncertainties and other factors, many of which are beyond our ability to control, that may cause our actual results, level of activity, performance or achievements to be materially different from those expressed or implied by such forward-looking information. Such factors include, without limitation: digital currencies demand and price volatility; risks and uncertainties associated with the digital currency industry; adapting to technological change, new products and standards; increased competition that adversely affects business; additional competition from new or existing technologies that adversely affect business; continued growth in key markets; the effectiveness and efficiency of advertising and promotional activities; political, economic, regulatory and other uncertainties in respect of digital currencies; that the Company’s software products and/or services may contain undetected errors or “bugs”, vulnerabilities or defects; damage or failure of our information technology; cybersecurity risks associated with data security and hacking; risks associated with potential violations of applicable privacy laws; fraud; risks resulting from interruptions or delays from third-party processors and service providers upon which we rely; risks associated with any continued sales growth; the on-going COVID-19 global pandemic, including the rapidly evolving reaction of governments, private sector participants and the public to the pandemic and/or the associated economic impact of that pandemic and the reaction to it that have impacted our operations and plans and will continue to impact our operations and plans for a period of time that remains uncertain; risks related to compliance with laws and regulations and the effect of changes in law and regulatory environment; fluctuations in foreign currency exchange rates; ability to obtain additional financing; loss of key personnel and our inability to attract and retain qualified personnel; potential losses, liabilities and damages related to our business which are uninsured or uninsurable; risks associated with litigation or dispute resolution; volatility of global financial conditions; taxation, including changes in tax laws and interpretation of tax laws; as well as other risks, uncertainties and other factors, including, without limitation, those referred to in the Company’s annual information and elsewhere herein. Although we have attempted to identify important factors that could cause actual results to differ materially from those contained in the forward-looking statements, there may be other factors that cause actual results to differ materially from those which are anticipated, estimated, or intended. There can be no assurance that such information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Readers are cautioned not to place undue reliance on the forward-looking statements or the assumptions on which the Company’s forward-looking statements are based. Readers are further cautioned that the foregoing list of risks and assumptions is not exhaustive and prospective investors should consult the more complete discussion of the Company’s business, financial condition and prospects that is included in this Investor Presentation. The forward-looking statements reflect current expectations regarding future events and operations and speak only as of the date of this Investor Presentation. The Company assumes no obligation to update publicly or otherwise revise any forward-looking statements to reflect actual results, changes in assumptions or changes in other factors affecting forward-looking statements, except to the extent required by applicable securities laws. If the Company does update one or more forward-looking statements, no inference should be drawn that the Company will make additional updates with respect to those or other forward-looking statements. The forward-looking statements contained in this Investor Presentation are expressly qualified in their entirety by the foregoing cautionary statements and those made in our other filings with applicable securities regulators in Canada and the United States.

About Our Company

We are a blockchain technology company dedicated to bringing decentralized financial solutions to global markets, by leveraging blockchain protocols that support stable programmable payments and open financial infrastructure development.

Mission

“

*To **make it easy**
for people to **save, invest and**
spend with
decentralized **cash***

Problem

Legacy financial infrastructure and monetary policies are negatively impacting the finances options of people globally.

- **High inflation** in emerging markets erodes local market purchasing power, reduces the desire to hold local currency, and discourages investment and savings.
- **Low interest rates** in developed markets is hurting savers, reducing the incentive to save, and build wealth to be prepared for financial emergencies
- **Legacy Payment Rails** results in slow transaction settlements between banking institutions with the global average settlement time 2-3 days.
- **High Transaction Costs** according to the World Bank sending remittances costs an average of 6.51% of the amount sent.

Country / Territory	Inflation rate (consumer prices) (%)
Venezuela	200,000.00
Zimbabwe	161.8
Argentina	54.80
South Sudan	48
Congo, Democratic Republic of the	41.50
Sudan	32.40
Angola	31.70
Libya	28.00
Iran	26.00
Syria	25.50
Suriname	22.00
Sierra Leone	18.00
Burundi	16.60
Nigeria	16.50
Mozambique	15.30
Haiti	14.70
Pakistan	14.56
Zambia	13.9
Azerbaijan	13.00

Solution

Currently in Alpha Version 0.6

A **peer-to-peer banking solution leveraging blockchain technology** designed for:

- Emerging markets customers to give them financial freedom to securely save, invest and spend, and protect them against inflation and local currency devaluation.
- Developed market customers who want to be able to save, build wealth for their family and the future with high interest savings accounts and more financial options.

Checking

Multi-currency stablecoins to protect against inflation and local currency devaluation.

Savings

High-interest savings accounts to build save money and build wealth.

Investments

Tokenized traditional financial and physical assets to improve accessibility to markets

Payments

Remittance and merchant solution with real-time settlement at a fraction of the cost

Checking Account

A faster and cheaper way to send money

Our mission is to give people financial freedom with a USD stablecoin and the power to decide how to save, invest, send and spend with decentralized cash.

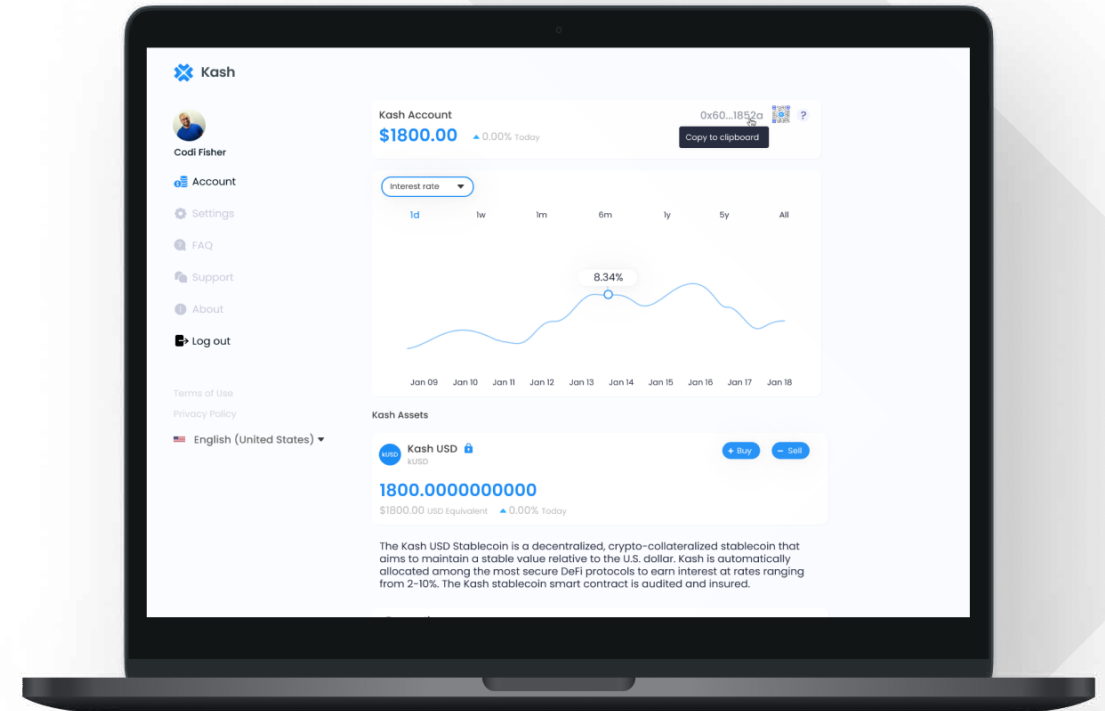

Powered by  Terra UST

Savings Account

- Grow your money with a high-interest savings account earning up to 20% interest annually.
- Open a free account in seconds, deposit funds and watch your savings grow.
- A simple and secure way to save in United States dollars and earn interest at rates above inflation.

Powered by  Anchor Protocol

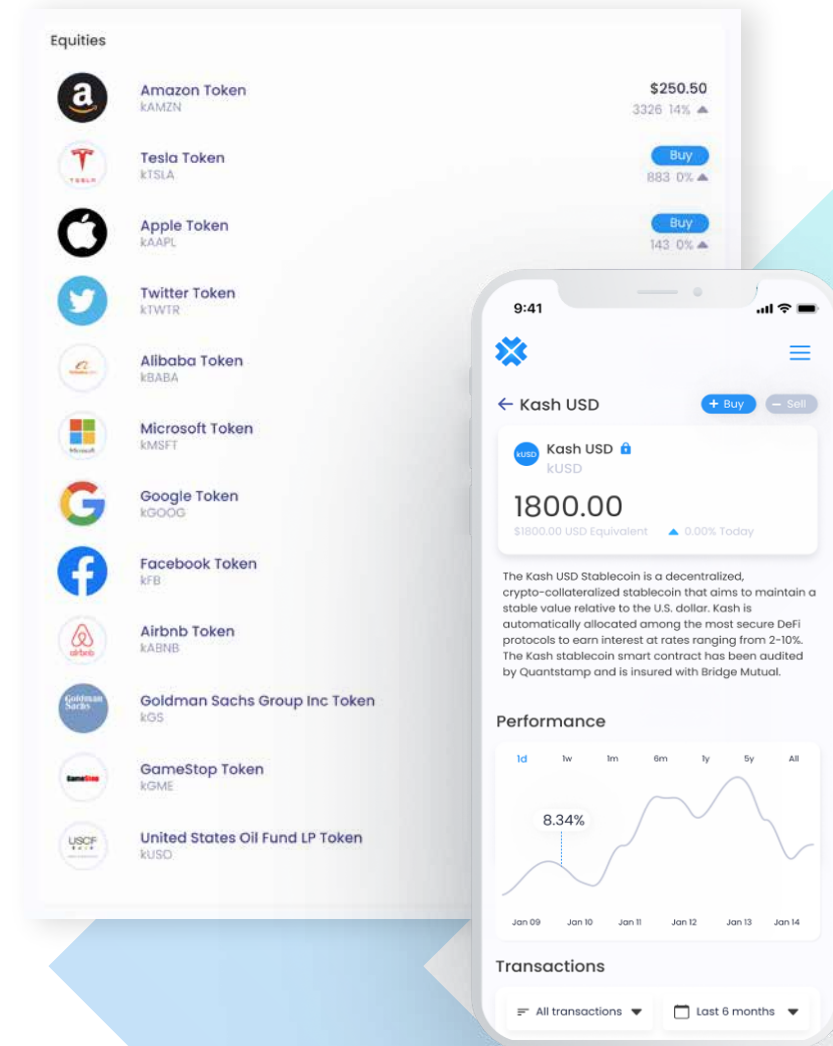

Investment Account

Improved access to investment opportunities globally

The Kash Investment account offers tokenized traditional financial assets such as stocks, bonds, and investment funds, as well as physical assets, such as real estate, commodities, precious metals, art, and other illiquid assets.

Designed to reduce friction between geographical boundaries and eliminate the costs associated with intermediaries, as well as to improve asset liquidity, efficiency and accessibility through fractional ownership.

Powered by  Mirror Protocol

Payments App

The easy way to spend your stablecoins

The Kash Payments app is expected to offer customers a seamless mobile payment experience with lower transaction fees and instant settlement based on blockchain technology that replaces the traditional complicated payments value chain including credit card networks, banks and payment gateways.

The Company is designing the solution for any type of P2P transfer such as remittance and e-commerce markets, working with partners to facilitate payments using the Kash stablecoin. The goal is to leverage DeFi payment rails to provide faster and more secure transactions at a fraction of the cost with savings for customers and merchants.

Market Validation

High Inflation Countries

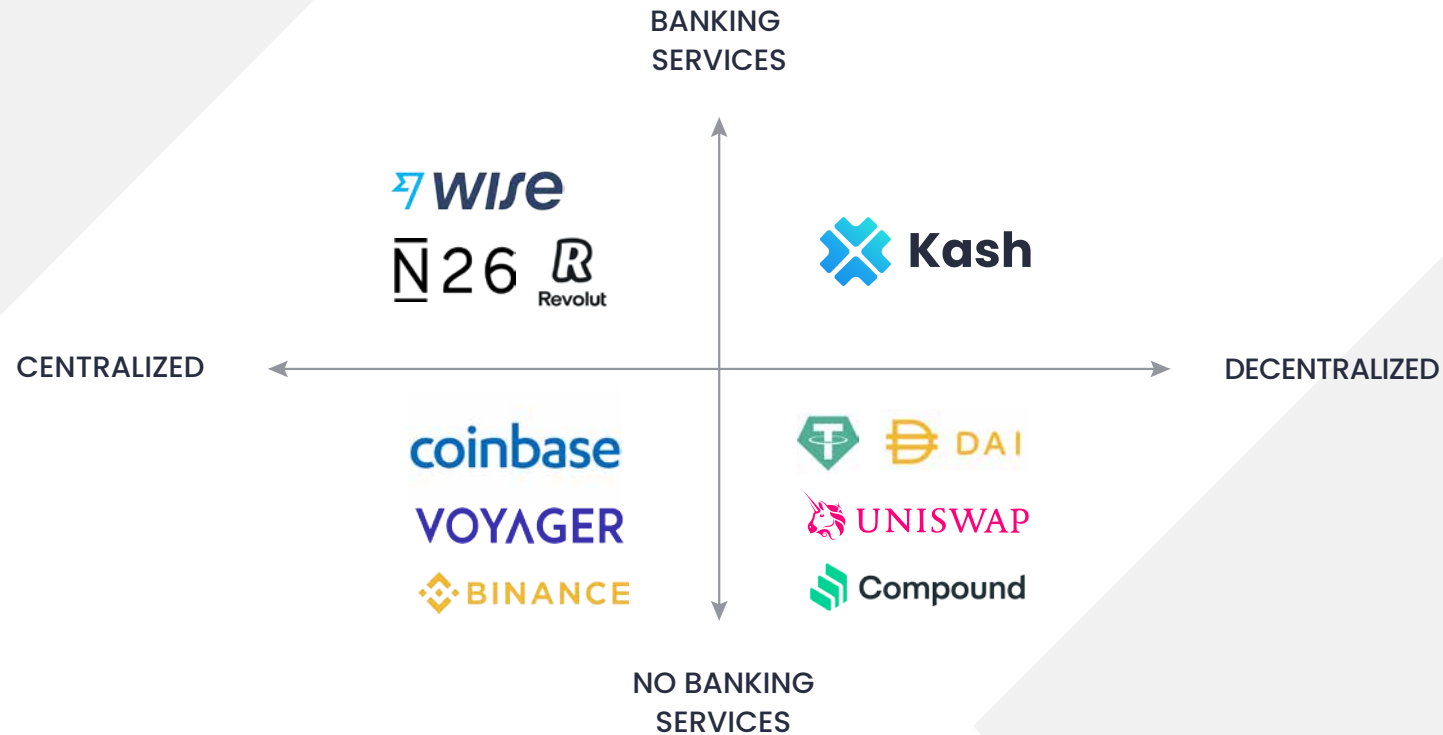

Low Interest Countries

Business Model

Competition

Go to Market Strategy

Addressing the highest problem markets first where we have strategic local market relationships

● Low Interest Markets

Country	Population
